Referring Dentist:

Telephone Number: Email:

*I will provide the highest standards of service to you and your patient.
I will not charge patients for the initial consultation or the review six months later.
Your patient will be given a clear written treatment plan and fee estimate at the initial consultation.
If during the course of treatment an alternative or additional treatment is required, I will notify you before continuing.
My preference is to return the patient to you with the root canal permanently sealed.
After completion of treatment and also after the review, I will promptly forward copies of the final radiographs to you for your records.
I value your referral. The Houston Group will not accept, or solicit, referred patients for ongoing dental care.*
